Columbus, OH 43215

**RE: BullsEye Telecom, Inc.
Revision for P.U.C.O Tariff No. 2 (Access)
Case No. 21-0651-TP-ATA**

Dear Ms. Troupe:

Enclosed for filing please find the above referenced tariff filing submitted on behalf of BullsEye Telecom, Inc. ("Company"). This filing is made to revise certain switched access rates in compliance with the requirements of the Report and Order, FCC 20-143, on 8YY Access Charge Reform issued by the Federal Communications Commission in WC Docket No. 18-156. Additionally, the Identification and Rating of Toll VoIP-PSTN Traffic is revised. The Company respectfully requests an effective date of July 3, 2021.

Any questions you may have regarding this filing should be directed to my attention at 407-740-3006 or via email to croesel@inteserra.com. Thank you for your assistance in this matter.

Sincerely,

/s/ Carey Roesel

Carey Roesel

Motion for protective order included with filing? Yes No
 Motion for waiver(s) filed affecting this case? Yes No [Note: Waivers may toll any automatic timeframe.]

Notes:

Sections I and II are pursuant to Ohio Administrative Code (OAC) [4901:1-6](#).
 Section III – Part I - Carrier to Carrier is pursuant to OAC [4901:1-7](#) and Pole Attachment to OAC [4901:1-3](#)
 Section III – Part II - Wireless is pursuant to OAC [4901:1-6-24](#).
 Section IV – Attestation.

- (1) Indicate the Carrier Type and the reason for submitting this form by checking the boxes below.
- (2) For requirements for various applications, see identified section of the Ohio Administrative Code Chapter 4901 and/or the supplemental application form noted.
- (3) Information regarding the number of copies required by the PUCO may be obtained from the PUCO's website at www.PUCO.ohio.gov under the docketing information system section (Procedural filing requirements), by calling the Docketing Division at 614-466-4095 or by visiting the Docketing Division at the offices of the PUCO.
- (4) An Incumbent Local Exchange Carrier (ILEC) offering basic local exchange service (BLES) outside its traditional service area should choose CLEC designation when proposing to offer BLES outside its traditional service area or when proposing to make changes to that service.

All filings that result in a change to one or more tariff pages require, at a minimum, the following exhibits:

Exhibit	Description:
A	The tariff pages subject to the proposed change(s) as they exist before the change(s).
B	The tariff pages subject to the proposed change(s), reflecting the change, with the change(s) marked in the right margin.
C	A short description of the nature of the change(s), the intent of the change(s), and the customers affected.
D	A copy of the notice provided to customers, along with an affidavit that the notice was provided according to the applicable rule(s).

Section I – Part I - Common Filings:

Section IV. – Attestation

Registrant hereby attests to its compliance with the pertinent entries and orders issued by the Commission.

AFFIDAVIT

Compliance with Commission Rules

I am an officer/agent of the applicant corporation, BullsEye Telecom, Inc. , and am authorized to make this statement on its behalf.

Carey Roesel
(Name)

Please check All that apply:

I attest that these tariffs comply with all applicable rules for the State of Ohio. I understand that tariff notification filings do not imply Commission approval and that the Commission's rules, as modified and clarified from time to time, supersede any contradictory provisions in our tariff. We will fully comply with the rules of the State of Ohio and understand that noncompliance can result in various penalties, including the suspension of our certificate to operate within the State of Ohio.

I attest that customer notices accompanying this filing form were sent to affected customers, as specified in Section II, in accordance with Ohio Adm. Code 4901:1-6-7.

I declare under penalty of perjury that the foregoing is true and correct.

OHa1402a

2. Rules and Regulations (Cont'd.)**2.12 Determination of Jurisdiction of Mixed Interstate and Intrastate Dedicated Transport Service (Cont'd.)**

2.12.2 When mixed interstate and intrastate service is provided over a dedicated facility, the jurisdiction will be determined as follows.

- (a.) If the Customer's estimate of the interstate traffic on the service equals 10% or less of the total traffic on that service, the service will be provided according to the applicable rules and regulations.
- (b.) If the Customer's estimate of the interstate traffic on the service is more than 10% of the total traffic on that service, the service will be provided according to the applicable rules and regulations of the appropriate interstate tariff.
- (c.) If the percentage of interstate traffic on the service changes to the extent that it alters the jurisdiction of the service, the Customer must notify the Company of any required change in status. The affected service will revert to the appropriate jurisdictional tariff within the next full billing cycle.

2.13 Identification and Rating of Toll VoIP-PSTN Traffic**2.13.1 Scope**

Toll VoIP-PSTN Traffic is the interexchange traffic exchanged in time division multiplexing ("TDM") format that originates and/or terminates in Internet protocol ("IP") format. This section governs the identification of Toll VoIP-PSTN Traffic that is required to be compensated at interstate access rates (unless the parties have agreed otherwise) by the Federal Communications Commission in its Report and Order in WC Docket Nos. 10-90 et. al. FCC No. 11-161 (November 18, 2011) ("FCC Order") and the FCC's Second Order on Reconsideration (April 25, 2012) ("Second Order"). Specifically, this section establishes the method of separating such traffic (referred to in this tariff as "Toll VoIP-PSTN Traffic") from the Customer's traditional intrastate access traffic, so that such Toll VoIP-PSTN Traffic can be billed in accordance with the FCC Order and Second Order. (T) (C) (C) (C)

This section of the tariff does not preclude carriers from negotiating different rates, terms and conditions governing compensation for Toll VoIP-PSTN traffic.

This tariff does not supersede rates, terms and conditions governing compensation for Toll VoIP-PSTN traffic in existing interconnection agreements.

2. Rules and Regulations (Cont'd.)**2.13 Identification and Rating of Toll VoIP-PSTN Traffic (Cont'd.)****2.13.2 Rating of Toll VoIP-PSTN Traffic**

The Company will bill Toll VoIP-PSTN traffic identified in accordance with this tariff Section as follows:

- Between December 29, 2011 and July 22, 2012, the applicable rate elements used in providing access for Toll VoIP PSTN Traffic that originates on the Company's network for termination to the Customer's end users (originating traffic) will be billed at interstate access rates, located at <https://apps.fcc.gov/etfs/public/lecTariffs.action?idLec=283>
- Beginning July 23, 2012 through June 30, 2014, the applicable rate elements used in providing access for Toll VoIP PSTN Traffic that originates on the Company's network for termination to the Customer's end users (originating traffic) will be billed at intrastate access rates, as set forth in Section 4 following.
- Beginning July 1, 2014 the applicable rate elements used in providing access for Toll VoIP PSTN Traffic that originates on the Company's network for termination to the Customer's end users (originating traffic) will be billed at interstate access rates, located at <https://apps.fcc.gov/etfs/public/lecTariffs.action?idLec=283>
- Beginning December 29, 2011, the applicable rate elements used in providing access for Toll VoIP PSTN Traffic that originates from the Customer's end users and terminates on the Company's network (terminating traffic) will be billed at interstate access rates located at <https://apps.fcc.gov/etfs/public/lecTariffs.action?idLec=283>

2.13.3 Calculation and Application of Percent-Toll VoIP-PSTN-Usage Factor

The Company will determine the number of Toll VoIP-PSTN Traffic minutes of use ("MOU") to which interstate rates will be applied under Section 2.13.2, above, by applying a Percent VoIP Usage ("PVU") factor to the total intrastate access MOU (however determined – either based on call detail information or PIU) exchanged between the Company and the Customer, until July 23, 2012 and after June 30, 2014. From July 23, 2012 through June 30, 2014, the PVU will be applied to only the terminating intrastate access MOU. The PVU will be derived and applied as follows:

- (A) Except as otherwise provided in Section 2.13.3(C) below, the Customer will (T) calculate and furnish to the Company a factor (the "PVU-A") representing the whole number percentage of the total intrastate access MOU that the Customer exchanges with the Company in the State, that (a) is terminating access sent to the Company and that originates in IP format; or (b) is originating access received from the Company and terminates in IP format until July 23, 2012 and after June 30, 2014. From July 23, 2012 through June 30, 2014, the PVU will represent only the terminating intrastate access MOU. This PVU-A shall be based on information such as the number of the Customer's retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information.

2. Rules and Regulations (Cont'd.)**2.13 Identification and Rating of Toll VoIP-PSTN Traffic (Cont'd.)****2.13.3 Calculation and Application of Percent-Toll VoIP-PSTN-Usage Factor (Cont'd.)**

(B) Except as otherwise provided in Section 2.13.3(C) below, the Company will, (T) likewise, calculate a factor (the "PVU-B") representing the percentage of the Company's total intrastate access MOU that the Company originates or terminates in IP format until July 23, 2012 and after June 30, 2014. From July 23, 2012 through June 30, 2014, the PVU will represent only the terminating intrastate access MOU. This PVU-B shall be based on information such as the number of the Company's retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information.

(C) The Company will use the PVU-A and PVU-B factors to calculate an effective PVU factor that represents the percentage of total intrastate access MOU exchanged between the Company and the Customer that is originated and/or terminated in IP format, whether at the Company's end, at the Customer's end, or at both ends until July 23, 2012 and after June 30, 2014. From July 23, 2012 through June 30, 2014, the PVU will represent only the relevant terminating intrastate access MOU. The effective PVU factor will be calculated as the sum of: (A) the PVU-A factor and (B) the PVU-B factor times (1.0 minus the PVU-A factor).

Note: PVU factors will not be provided or collected by the Company for the traffic period from July 1, 2013 through June 30, 2014. This represents the period during which the Company's terminating intrastate rate is equal to its terminating interstate rate and PVU is not applied to originating traffic. Traffic on or after July 1, 2014 will be subject to the most recently available PVU factor on file with the Company for application of charges to originating access traffic. PVU updates must be received at least 30 days prior to July 1, 2014 if a new factor will apply. (N)

2. Rules and Regulations (Cont'd.)**2.13 Identification and Rating of Toll VoIP-PSTN Traffic (Cont'd.)****2.13.3 Calculation and Application of Percent-Toll VoIP-PSTN-Usage Factor (Cont'd.)**

- (D) The Company will apply the effective PVU factor to the applicable intrastate terminating switched access MOU exchanged with the Customer to determine the number of Toll VoIP-PSTN Traffic MOUs. (C)
(C)

Example 1: The PVU-A is 40% and the PVU-B is 10%. The effective PVU factor is equal to $40\% + (10\% \times 60\%) = 46\%$. The Company will bill 46% of the Customer's applicable intrastate terminating switched access MOU in accordance with the Company's interstate switched access tariff. (C)
|
(C)

Example 2: The PVU-A is 0% and the PVU-B is 10%. The effective PVU factor is $0\% + (10\% \times 100\%) = 10\%$. The Company will bill 10% of the Customer's applicable intrastate terminating switched access MOU in accordance with the Company's interstate switched access tariff. (C)
(C)

Example 3: The PVU-A is 100%. No matter what the PVU-B factor is, the effective PVU is 100%. The Company will bill 100% of the Customer's applicable intrastate terminating switched access MOU in accordance with the Company's interstate switched access tariff. (C)
(C)

In all examples above, the Company will apply the PVU to both originating and terminating intrastate MOU beginning July 1, 2014. (N)
(N)

- (E) If the Customer does not furnish the Company with a PVU-A pursuant to 2.13.3.A preceding, the Company will utilize an effective PVU equal to the PVU-B.
- (F) The Customer shall not modify their reported PIU factor to account for toll VoIP-PSTN Traffic.

3. Description of Services (Cont'd.)**3.1 Access Services (Cont'd.)****(A.) Switched Access (Cont'd.)****1. Application of Access Charges to Toll VoIP-PSTN Access Traffic (N)**

(a) In the absence of an agreement between the Company and the Customer specifying the treatment of Toll VoIP-PSTN Traffic, all Toll VoIP-PSTN Access traffic will be assessed switched access charges at the rates set forth in Section 2.13.2 of this tariff.

(b) The Company shall assess and collect switched access rate elements under this tariff for access services, regardless of whether the Company itself delivers such traffic to the called party's premises or delivers the call to the called party's premises via contractual or other arrangements with an affiliated or unaffiliated provider of VoIP service that does not itself seek to collect switched access charges for the same traffic. The Company will charge for functions provided by the Company, its affiliated or unaffiliated provider of VoIP service. For purposes of this provision, functions provided by the Company, its affiliated or unaffiliated provider of VoIP service as part of transmitting telecommunications between designated points using, in whole or in part, technology other than TDM transmission in a manner that is comparable to a service offered by a local exchange carrier constitutes the functional equivalent of carrier access service. (N)

(B.) 800 Data Base Access Service

800 Data Base Access Service is a service offering utilizing originating trunk side Switched Access Service. The service provides for the forwarding of end user dialed 800 calls to a Company Service Switching Point which will initiate a query to the data base to perform the Customer identification and delivery function. The call is forwarded to the appropriate Customer based on the dialed 800 number.

For 800 Data Base Access Service, the Customer shall order the service in accordance with the preceding provisions set forth for Feature Group D. If the Customer desires any of the optional features available with 800 Data Base Service, the Customer shall so specify on the order for service.

4. Rates (cont'd.)**4.1 Access Service – AT&T Territory (cont'd.)**

4.1.3	<u>Local Switching</u>		(T)
	Per Access Minute	Note 1	(T)
4.1.4	<u>Host Remote Transport</u>

2. Rules and Regulations (cont'd.)

2.12 Determination of Jurisdiction of Mixed Interstate and Intrastate Dedicated Transport Service (cont'd.)

2.12.2 When mixed interstate and intrastate service is provided over a dedicated facility, the jurisdiction will be determined as follows. (M)

- (a.) If the Customer's estimate of the interstate traffic on the service equals 10% or less of the total traffic on that service, the service will be provided according to the applicable rules and regulations.
- (b.) If the Customer's estimate of the interstate traffic on the service is more than 10% of the total traffic on that service, the service will be provided according to the applicable rules and regulations of the appropriate interstate tariff.
- (c.) If the percentage of interstate traffic on the service changes to the extent that it alters the jurisdiction of the service, the Customer must notify the Company of any required change in status. The affected service will revert to the appropriate jurisdictional tariff within the next full billing cycle. (M)

2.13 Identification and Rating of Toll VoIP-PSTN Traffic

2.13.1 Application of Access Charges to Toll VoIP-PSTN Access Traffic (M)

- (a) In the absence of an agreement between the Company and the Customer specifying the treatment of Toll VoIP-PSTN Traffic, all Toll VoIP-PSTN Access traffic will be assessed access charges at the rates set forth in Section 2.13.3 of this tariff. (T)
- (b) The Company shall assess and collect access rate elements under this tariff for access services, regardless of whether the Company itself delivers such traffic to the called party's premises or delivers the call to the called party's premises via contractual or other arrangements with an affiliated or unaffiliated provider that does not itself seek to collect access charges for the same traffic. The Company will charge for functions provided by the Company and/or its affiliated or unaffiliated providers of VoIP service. For purposes of this provision, functions provided by the Company, or its affiliated or unaffiliated provider of VoIP service as part of transmitting telecommunications between designated points using, in whole or in part, technology other than TDM transmission in a manner that is comparable to a service offered by a local exchange carrier constitutes the functional equivalent of carrier access service. (T) (M)

2. Rules and Regulations (Cont'd.)

2.13 Identification and Rating of Toll VoIP-PSTN Traffic (Cont'd.)

2.13.2 Scope

Toll VoIP-PSTN Traffic is traffic exchanged in time division multiplexing ("TDM") format that originates and/or terminates in Internet protocol ("IP") format. This section governs the identification of Toll VoIP-PSTN Traffic that is to be compensated at interstate access rates (unless the parties have agreed otherwise) in accordance with applicable law. Specifically, this section establishes the method of separating such traffic (referred to in this tariff as "Relevant VoIP-PSTN Traffic") from the Customer's traditional intrastate access traffic.

2. Rules and Regulations (Cont'd.)**2.13 Identification and Rating of Toll VoIP-PSTN Traffic (Cont'd.)****2.13.3 Rating of Toll VoIP-PSTN Traffic (T)**

Relevant VoIP-PSTN Traffic identified in accordance with this tariff Section 2.13 will be billed in accordance with the Company's applicable interstate switched access tariff. Current and pending interstate access rates for the Company are located at <https://apps.fcc.gov/etfs/public/lecTariffs.action?idLec=283> (C)

2.13.4 Calculation and Application of Percent-Toll VoIP-PSTN-Usage Factor (T)

The Company will determine the number of Relevant VoIP-PSTN Traffic minutes of use ("MOU") to which interstate rates will be applied under Section 2.13.3 above, by applying a Percent VoIP Usage Factor ("PVU Factor") to the total intrastate access minutes of use identified by the Company as being exchanged between the Company and the Customer. The PVU Factor will be derived and applied as follows: (T)

1. The Company will apply a PVU Factor furnished by the Customer if and only if the Customer satisfies all of the following requirements: (C)
 - a. Customer furnishes to the Company a PVU Factor at least fourteen (14) days, and no sooner than thirty (30) days, in advance of the first day of each quarter (*i.e.*, January 1, April 1, July 1, and October 1) for application in the subsequent quarter.
 - b. The PVU Factor furnished by the Customer for each given quarter accurately represents the whole number percentage of the total intrastate access MOU that Customer exchanges with Company in the State that is originating access received by Customer from Company and terminates in IP format.
 - c. Concurrent with the furnishing of the PVU Factor for each given quarter, Customer provides auditable data and underlying documentation to the Company (*e.g.*, traffic study data, network usage data, FCC Form 477 Report data) that fully supports the PVU Factor furnished for that quarter.
 - d. Customer clearly indicates the source of all data used to compute Customer's furnished PVU Factor. If a spreadsheet is submitted, each cell must either (a) include the formula used to calculate the data in the cell or (b) be based on an external source for which the underlying documentation is also furnished by the Customer to the Company. The data and documentation submitted in support of the PVU Factor shall not be more than one year older than the date on which the PVU Factor is furnished to the Company. (C)

2. Rules and Regulations (Cont'd.)**2.13 Identification and Rating of Toll VoIP-PSTN Traffic (Cont'd.)****2.13.4 Calculation and Application of Percent-Toll VoIP-PSTN-Usage Factor (Cont'd.)**

1. The Company will apply a PVU Factor furnished by the Customer if and only if (C) the Customer satisfies all of the following requirements: (continued)
 - e. Upon request of the Company, Customer makes available to Company any and all additional underlying records or other information necessary to verify the PVU Factor and the data and documentation submitted by Customer in support of Customer's furnished PVU Factor. Customer shall retain all data, documentation, call details, work papers, and/or other information used to develop or support each quarterly PVU Factor for a minimum of one year from the date on which the PVU Factor is furnished to the Company.
2. If Customer does not furnish Company with a PVU Factor and supporting documentation pursuant to Section 2.13.4., above, the Company may apply a PVU Factor equal to the percentage of VoIP subscribers in the state based on the most recent Local Competition Report released by the FCC, calculated based on the total number of incumbent LEC and non-incumbent LEC VoIP subscriptions in the state divided by the sum of the total reported number of VoIP subscriptions plus incumbent LEC and non-incumbent LEC switched access lines. 3. Description of Services (Cont'd.)

3.1 Access Services (Cont'd.)

(M)

(M)

(B.) 800 Data Base Access Service

800 Data Base Access Service is a service offering utilizing originating trunk side Switched Access Service. The service provides for the forwarding of end user dialed 800 calls to a Company Service Switching Point which will initiate a query to the data base to perform the Customer identification and delivery function. The call is forwarded to the appropriate Customer based on the dialed 800 number.

For 800 Data Base Access Service, the Customer shall order the service in accordance with the preceding provisions set forth for Feature Group D. If the Customer desires any of the optional features available with 800 Data Base Service, the Customer shall so specify on the order for service.

BullsEye Telecom, Inc.

EXHIBIT C

Summary of Changes

This filing is made to revise certain switched access rates in compliance with the requirements of the Report and Order, FCC 20-143, on 8YY Access Charge Reform issued by the Federal Communications Commission in WC Docket No. 18-156. Additionally, the Identification and Rating of Toll VoIP-PSTN Traffic is revised.
