I urge you to side with the residents of Washington township who are extremely against the building of solar farms. We must own 40 acres in order to build a house because the township is zoned agricultural for a reason. We do not want subdivisions, apartment complexes, solar farms, etc. We want our fresh air and to look off the back deck and see crops growing for miles. Would you want to eat dinner on a back deck surrounded by solar panels? We chose to build families in this township for a reason, nothing could impede our farming community, until now as we are fighting with everything to get the solar farm shut down.
