RE: Section 106 Review-Bandanna Drive Pipeline Replacement Project, Cincinnati, Hamilton County, Ohio.

Dear [REDACTED]:

This letter is in response to correspondence received on October 8, 2020 regarding the proposed Bandanna Drive Pipeline Replacement Project that is being submitted as a requirement of the Ohio Power Siting Board (OPSB) Construction Notice. We appreciate the opportunity to comment on this project. The comments of the Ohio State Historic Preservation Office (SHPO) are made pursuant to Section 149.53 of the Ohio Revised Code requesting cooperation among state agencies in the preservation of historic properties, Ohio Administrative Code Chapters 4906-4-08 (D). The comments of the Ohio SHPO are also submitted in accordance with the provisions of Section 106 of the National Historic Preservation Act of 1966, as amended (54 U.S.C. 306108 [36 CFR 800]).

The proposed undertaking involves the replacement and installation of approximately 2,000 LF of new 24-inch gas pipeline within a new trench that will be adjacent to an existing pipeline, both of which are located within existing street right-of-way (ROW). Additionally, two laydown yards/staging areas are also proposed for the project. According to the information provided, which included a check of our records (Project Summary Form), no historic properties, previously recorded cultural resources, or previous surveys are documented within or adjacent to the Area of Potential Effects (APE), as defined in the submission. Therefore, based on previously disturbed ROW/urban development, Urban land soils, and steep slope, the SHPO concurs with Wood that this project, as proposed, has little to no potential to contain significant archaeological deposits and will have no effect on historic properties. No further coordination is required for this project unless the scope of work changes or archaeological remains are discovered during the course of the project. In such a situation, this office should be contacted as required by 36 CFR § 800.13. If you have any questions concerning this review, please contact me by email at [REDACTED]

Sincerely,

[REDACTED]

RE: Section 106 Review-Additional Laydown yard for Bandanna Drive Pipeline Replacement Project,  
Cincinnati, Hamilton County, Ohio.

Dear [REDACTED]:

This letter is in response to correspondence received on March 4, 2021 regarding an additional laydown yard for the proposed Bandanna Drive Pipeline Replacement Project that is being submitted as a requirement of the Ohio Power Siting Board (OPSB) Construction Notice. We appreciate the opportunity to comment on this project. The comments of the Ohio State Historic Preservation Office (SHPO) are made pursuant to Section 149.53 of the Ohio Revised Code requesting cooperation among state agencies in the preservation of historic properties, Ohio Administrative Code Chapters 4906-4-08 (D). The comments of the Ohio SHPO are also submitted in accordance with the provisions of Section 106 of the National Historic Preservation Act of 1966, as amended (54 U.S.C. 306108 [36 CFR 800]).

The aforementioned project will require the addition of an approximately 1.75-acre laydown area located along the north side of Palisades Drive, just west of the intersection with Anderson Ferry Road. According to the information provided, which included a check of our records, no historic properties, districts, previously recorded cultural resources, or previous surveys are documented within or adjacent to this new laydown area, which is considered the direct Area of Potential Effects (APE). Therefore, based on aerial photographs starting in the 1930s to the present and the presence of Urban land soils, it is the SHPO's opinion that this new laydown area, as proposed, has little to no potential to contain significant archaeological deposits. The use of this new laydown area will have no effect on historic properties. No further coordination is required for this project unless the scope of work changes or archaeological remains are discovered during the course of the project. In such a situation, this office should be contacted as required by 36 CFR § 800.13. If you have any questions concerning this review, please contact me by email at [REDACTED].

Sincerely,

[REDACTED]
