Subject: Birch Solar Project

Mr. Butler,

I am writing this letter to express my concern about the Birch Solar project and how it is not a good idea to have a massive solar project near a highly populated area. I live in Shawnee Township and this project will rap massive steal structures around a very populated rural community. It will affect the natural landscape of the region and will affect the animals that live and travel through the area. I believe this project is wrong for our community and we already have enough industrial structures throughout the township. The economic benefits that these projects predict will not help our local community: the electricity will go to other places, the schools will not have much of a benefit and the people will have to live with a potential environmental threat. I am requesting that you deny the application proposed by Birch Solar: the people of Allen County/Shawnee Township do not want the project here.
