PUCO

This is in regards to the yellow wood solar project in Clinton county. I am for the project and for these reasons I do believe it is landowners right to choose what best for their land and family they have worked and paid for that right and I believe the many benefits it will bring to our community and surrounding area the funding for our local schools as well as police and fire departments one final one and maybe the biggest our own planet my must find different ways to find clean energy and I believe this project will be a good beginning. Please file this in public comments. Thank you
