TO THE OPSB:

We are involved in the Palomino Solar Project in Union township on Johnson Rd.

The opposition keeps making statements about the impact the solar project will have on the devaluation of their property, referring to studies of University of Texas. We don't live in Texas. OUR property will be devalued if this project doesn't go through.

My question is, who will be liable for the devaluation of our property?

Those opposed to the project are trying to make an issue about their rights. What about OUR rights? IT IS OUR LAND!

We're not telling them what to do with their property. Will we have the opportunity to make a decision when they want to sell their property?

It is OUR property. We hold the deed. It is our right to do what we see fit. The solar panels are renewable energy.

We live in America. No one has the right to take our rights as landowners away from us. It is a RIGHT FOR THE PEOPLE BY THE PEOPLE.

I DO NOT understand why we are being challenged about our property rights.

This has got out of hand. The opposition has defaced signs supporting the project that are on private property and are trespassing in doing so. This has separated a good community for no good reason.

When these solar panels are approved it will be good for the community. The financial support that goes to schools and the local business it will generate for the local area, and the jobs it will create.

We hope you will approve all 3 solar projects.

Thank you for your time on the OPSB and the job you do.
