**OPSB DATA REQUEST THIRD SET
(Dated July 28, 2021)**

**Union Ridge Solar
Case No. 20-1757-EL-BGN**

1. *Page 8 of Exhibit K (Route Evaluation Study and Traffic Control Plan by Hull & Associates) discusses embankment erosion at two of the four culverts along York Road. Has the erosion issue been discussed with the County Engineer and is it significant to the point where it requires any follow-up mitigative measures?*

RESPONSE: Union Ridge Solar, LLC had conversations with the Licking County Engineer regarding weight restrictions and other matters relating to its probable haul routes, but not specifically regarding the minor embankment erosion involving two culverts along a portion of York Road (a probable haul route). Based on the observations made by Hull & Associates during the Route Evaluation Assessment, the embankment erosion is near the road surface but has not compromised the integrity of the road at this time. The County Engineer indicated there was no planned maintenance in the next two years on the probable haul route, which includes York Road. In the event any maintenance or repair is needed at the two culverts along York Road, it can be addressed through the RUMA or another agreement with Licking County.
