ME: Alan Hertlein
ADDRESS: 3208 Townsend Rd
Lynchburg Oh 45142

OBJECT #: 20-1680-EL-BGN

OBJECT NAME: YELLOW WOOD SOLAR

STATEMENT: My Father was a farmer and I started helping him when
I was ten years old right then I knew this would be
my life now I am 62 I love farming there is nothing
better than watching things grow and see what
you accomplished when you see fields of beautiful
green. They are wanting to put solar in land
from people who I presently eat which the company
made everything sound so good so they are going for
stupidly the money. That is 352 acres that I will lose.
When they drive post in the ground they will be hitting tile that

runs through their land and also runs through my land
therefore it will mess up my land so it won't drain right concerned
is this affecting you mentally as far as about how hot these solar panels will get and reflect more
s, depression, loss of friends, neighbors, etc.? heat on the grass I planted beside them my crop will
be less profitable

I have been stressing so much over all of this I don't understand what
benefits this is really going to do for us in this Area nothing! We live in
a small community the country roads we drive down have lots of farmland,
Neighbors all around but separated by land which gives everyone privacy
No one wants to look across their road or beside their home and see ugly fences
with even ugly solar panels We don't want to move but if a person choose to
ture: there is no way anyone would buy a home next to a field of solar. If these projects
are only going to benefit the Big Cities then take them there We don't want the
