Steven T. Nourse Vice President – Legal (614) 716-1608 (P) (614) 716-2014 (F) stnourse@aep.com Re: In the Matter of the Alternative Energy Rider and Auction Cost Recovery Rider for Ohio Power Company, Case No. 15-1052-EL-RDR

Dear Ms. Troupe:

On August 31, 2021, I filed the AER/ACRR update for the 4th Quarter of 2021 in this docket. It has come to my attention that the cover letter and schedules contained multiple errors, so I am submitting this revised version and request that the Commission disregard the version that was docketed on August 31, 2021. I apologize for any inconvenience this may have caused.

On February 25, 2015, the Commission Issued an Opinion and Order adopting certain portions of AEP Ohio's Electric Security Plan in Case Nos. 13-2385-EL-SSO, et.al (Opinion and Order). The Opinion and Order provided for the implementation of an auction cost reconciliation rider (ACRR) and the elimination of the Company's current auction phase-in rider (APIR) and fixed cost rider (FCR) in addition to the FAC mechanism, following a final true-up of all costs incurred through May 2015. The Opinion and Order also provided for continuation of the Alternative Energy Rider (AER).

On June 1, 2015, the Company filed its Application to initiate this proceeding for purposes of filing quarterly updates to the ACRR and AER. Under the Opinion and Order, the adjusted AER and ACRR rates become effective unless the Staff raises issues prior to the billing cycle during which the quarterly adjustments are to become effective.

On April 25, 2018, the Commission Issued an Opinion and Order adopting the Stipulation in AEP Ohio's Electric Security Plan in Case Nos. 16-1852-EL-SSO, et.al (Opinion and Order). The Stipulation removed the Commission and OCC assessment fees from the ACRR collection.

On November 21, 2019, the Commission Issued an Opinion and Order in Case No. 19-2031-EL-UNC that established January 1, 2019 as the effective date for baseline reductions to exclude the load and energy usage of mercantile customers as required by Amended Substitute House Bill No. 6 of the 133rd Ohio General Assembly. In accordance with the Order, the Company will eliminate the AER for any customer that self-assess the kilowatt hour tax rider.

On November 25, 2020, the Company filed a proposal in Case No. 20-1745-EL-RDR to revise its AER rates. On December 21, 2020, the Staff issued its review and recommendations in Case No. 15-1052-EL-RDR that addressed the Company's filing in Case No. 20-1745-EL-RDR. Staff recommended that AEP Ohio's current AER rates remain in effect until such time as the Commission issues a final decision in Case No. 20-1745-EL-RDR. On December 22, 2020, in Case No. 15-1052-EL-RDR, in order to afford Staff sufficient time to review AEP Ohio's proposal in Case No. 20-1745-EL-RDR, the attorney examiner determined that the Company's current AER rates should remain in effect, until otherwise ordered by the Commission. In compliance with the aforementioned determination, the Company is submitting its quarterly AER filing as traditionally calculated (Schedules 2 and 3); however, the actual AER tariff rates will remain unchanged. For that reason, no redlined tariff is included.

Schedule 1: Shows calculation of the ACRR.

Schedule 2: This schedule shows the current AER rate by delivery voltage in Column A. Column B shows the forecast component (FC) rate that would be necessary to recover the estimated REC expense for the 4th quarter of 2021. Column C shows the reconciliation adjustment (RA) that would be necessary to recover the actual REC over/under-recovery experienced from the previous quarter. Column D is the sum of the FC component and the RA component.

<u>Schedule 3:</u> This schedule shows the Company's estimates of the REC cost by month it is expecting to incur in the 4th quarter of 2021. This estimate is based on the total contractual obligation of its legacy renewable energy purchase agreement (REPA) as permitted through House Bill 6. Schedule 3 calculates the rates by voltage that would be necessary to recover the forecast costs.

Schedule 4: This schedule shows the over/under-recovery of REC expense for the months of April, May and June of 2021. Schedule 4 calculates the adjustment to the AER rates that would be necessary to recover the over/under-recovery during the 4th quarter of 2021. Also, shown and included in the total AER cost is an amount representing the revenue requirement associated with solar panels installed by the

Company to help meet the renewable energy requirements of SB221, as well as other renewable energy costs.

Schedule 5: This schedule shows the redline tariff for the ACRR.

Schedule 6: This schedule shows the redline tariff for the AER.

Thank you for your attention to this matter.

Respectfully Submitted,

/s/ Steven T. Nourse
