Case # 20-1680-EL-BGN

Our farm has been in the family for 60+ years. A beautiful, peaceful, agricultural community since the beginning of time. I listen to our neighbor's cries as to why us? Why must they destroy our community? Why must I be encased in solar panels? Why must we have to see and hear these atrocious sites daily? Why do we let the Chinese intrude on our properties? Why will my property become a solar junk yard? Why do a few greedy become rich off of our losses? The greedy feel they have the right to do as they please with their land. Don't we have the right to protect our community, our county, our state and our homes? Don't we have the right to peace, solitude, safety and a clean and pristine environment? Why must we sacrifice our investments for the greedy? Why, why, why?

Is it right to sacrifice thousands of acres of prime farmland for the greed of others? The science says that there are problems with water quality and quantity, problems with chemical toxicity of our soils, problems with disposal of waste, problems with potential health risks, problems with EMF radiation, problems to our wildlife and environment that may never be corrected. Do we listen to science?

The wrong decision can affect eternity. STOP the solar fiasco and protect my community and home.
