Hi, the above ground transmission lines should not be going across public housing properties west of Patrick Brush Run Rd & south of Hoover Bault Rd. They should cross on Randy Trapp's land to the east of Patrick Brush Run Rd. They are going across Trapp's land anyways. There are too many houses & residents on Hoover Bault Rd & Patrick Brush Run Rd connection area. Also Hoover Bault Rd, Patrick Brush Run Rd and St Rt. 347 intersections and to the west along ST RT 347. There are already distribution lines on Trapp's land east of Patrick Brush Run Rd, this is where if any new lines should be and cross over Patrick Brush Run Rd staying on Trapp's land. Not west of Patrick Brush Run behind & beside the houses along the Hoover Bault Rd, Patrick Brush Run Rd St Rt. 347 areas. This is terrible and will be disrupting to all of these residents. This should be stopped and reconsidered. Why would you put new transmissions lines around all these houses when there is open farm land with transmission lines already to the east? Also there has always been past generations of people in this particular area testifying there was Native America camps and villages as well as a burial grounds on the Patrick Brush Run Rd east side, Hoover Bault Rd north and south sides and St RT 347 to Mill Creek to Peoria. We and many residents as well as others have found artifacts found here over the years. My family has been here on Hoover Bault Rd for around 80 years and other side of family south of Raymond from early 1900's. Also family west of Broadway from the 1800's. There has been a lot of people that didn't do their homework on this. This is a sacred historic primitive area. Now you want to let these Solar Energy people destroy and disrupt this area? They want to run their lines and panels where ever they want without regard to residents or anyone or anything else. The so called research that has been completed has been done so inaccurately or not at all. Respectively Marvin & Carol Yeoman
