I am writing to encourage the OPSB to approve the Yellow Wood Solar Project in Clark Township, Clinton County, Ohio.

The project will benefit Clinton County in at least three ways [1] generate clean electrical energy for use in the immediate area, [2] stabilize the income of locally owned family farms in the project area, and [3] provide jobs to area residents both during the construction and into the future with maintenance of the solar generating facility.

The income to the county from the building and operation of the Yellow Wood Solar Project will result in a stable source of funds for schools and general operating expenses in Clinton County if the terms of the PILOT plan are acceptable to the County Commissioners.

Please approve the Yellow Wood Solar Project in Clinton County.
