**Subject:** RE: [EXTERNAL] Railroad Signal Project

Hi Michael,

I had it on my schedule to start the design first week in August to make the November need date. I have 2 jobs I need to get out in the next week and then I can begin work on this one.

Thanks,

**Chris Frank**

Chris:

Do you have an update since our meeting May 12<sup>th</sup> meeting at the Subject railroad crossing? We discussed the proposed railroad signals including the cantilevered flashing lights to be placed on the south side of the highway. You indicated Duke will raise the overhead facilities.

The Ohio Rail Development Commission has issued a construction authorization letter to the railroad. The railroad's first step will be to install the new meter pole and establish the new power service. Soon we will be looking for the contractor to schedule construction. The new meter pole will be installed near the existing signal equipment bungalow which is on the south side of the road and tracks.

Regards,

Michael Forte' | President, Project Manager
