I am very concerned about many things regarding this solar project. Most disturbing to me is the massive size of this project and how they are proposing to put this on and around highly densely populated homes, neighborhoods and townships. PLEASE look at this. This is too large of a project for this area. They are taking the rights away from too many people and destroying too many peoples lives if this goes in. This should never be so close to so many people and they certainly picked the wrong place to try to put this in. Tell BP to find a remote area. This is crazy destruction of lives, agriculture, safety, wildlife, health, etc. Please turn this industrial solar project down. It doesn't benefit us residents at all. Please consider the massive size and location which affects too many homeowners and township residents.
