1 INTRODUCTION

Flint Grid, LLC (Flint Grid or Applicant) is proposing to construct a 200-megawatt (MW) battery storage facility in an approximately 15-acre area south of Jug Street Road in Licking County, Ohio (Flint Grid Project or Project). Flint Grid plans to develop, own, and operate the Flint Grid Project. As such, Flint Grid, intends to be a good neighbor in the local community to the maximum extent practicable. Flint Grid will keep the community informed of Project updates and will address comments, concerns, or questions from the local public during all phases of the Project. This Public Interaction Plan documents Flint Grid's ongoing and planned community engagement activities.

2 COMMUNITY ENGAGEMENT

During the Project development process, Flint Grid communicated about the Project with local officials and community organizations, including Licking County Planning and Engineering, Jersey Township Trustees, Jersey Township Zoning Commission, New Albany Community Development and Engineering, and Monroe Township Fire Department. Flint Grid has worked closely with Jersey Township officials to develop a permitting path for Project development within the parcels that comprise the Project Area. As a result, in March 2021, Jersey Township amended their zoning code to include "Battery Based Energy Storage Park" as a conditionally permitted use within properties zoned as Light Manufacturing (M-1). In August 2021, Jersey Township rezoned the Project Area parcels from Rural Residential (RR) to M-1 in order to accommodate the Project, which qualifies as a Battery Based Energy Storage Park.

Flint Grid held an in-person public information meeting on November 9, 2021, to provide Project-specific information to the public and answer questions from the community. Prior to the public information meeting, community members were notified about the meeting by a public notice published in the Newark Advocate, targeted mailings to neighboring properties, and a notification letter filed on the Ohio Power Siting Board docket. The Project website (described below) also provided notice of the planned meeting and was updated with copies of meeting posters after the meeting. As part of the Ohio Power Siting Board (OPSB) permitting process, a local public hearing will be held to obtain on-the-record comments regarding the Project.

3 PROJECT WEBSITE

In order to continue to keep the public informed about the Project, and obtain input from the public about the Project, the Applicant has developed a Project website (ablegridenergy.com/flint-grid). The website contains Project-specific information, provides links to information on the OPSB permitting process and public involvement, and gives contact information for Project representatives. The website will be updated regularly and will act as a source of information for any community members, government officials, and interested parties.

4 PUBLIC QUESTIONS, CONCERNS, AND COMPLAINTS

Flint Grid has developed a Complaint Resolution Plan to address public questions, concerns, or complaints during all phases of the Project. The Complaint Resolution Plan provides several methods for members of

the public to submit questions, concerns, or complaints. The Plan further describes how Flint Grid will document and address complaints.

5 PUBLIC INTERACTION DURING CONSTRUCTION

At least seven days prior to the start of construction, Flint Grid will provide notice of planned construction to property owners and tenants adjacent to the Project Area, anyone who requested updates regarding the Project, government officials, and emergency responders. The notices will be sent via mail and will provide information about the Project, including contact information and a copy of the final Complaint Resolution Plan. Additionally, contact numbers for construction management personnel will be posted at the Project entrance.

6 PUBLIC INTERACTION DURING OPERATION

At least seven days prior to the start of operation, Flint Grid will provide notice of planned operation to property owners and tenants adjacent to the Project Area, anyone who requested updates regarding the Project, government officials, and emergency responders. The notices will be sent via mail and will provide information about the Project, including contact information and a copy of the final Complaint Resolution Plan. Additionally, contact numbers for facility operation management will be posted at the Project entrance.
