---

I am voicing my concerns against the solar panel projects ,which I object to being placed across the street from our home

One of many questions I have is, since lines will be maintained by Logan County Co Op, will Logan County Co Op residents see increase in their utility bill?

There are many reasons we are against this, but a few of the most important are the hazardous it causes over a period of time, there are some toxic material in these panels, and when broken down it leaks into our land Causing toxins in our land

We do not want the dangerous electromagnetic waves from the panels that can cause dangerous radations not to mention property value, water drainage concerns,as West Mansfield is already a flood zone at the slightest rainfall as well as toxic pollutant into our water

Thank you for hearing me out

Kim Kerns
