Subject: 20-0417-EL-BGN Grover Hill Wind, LCC

Good Afternoon Matthew,

Chase Dunderman and myself would like you to file pictures that were taken of the Blue Creek Project that is around our neighboring communities of Scott, Ohio and Haviland, Ohio in Paulding county just 5 miles west on SR 114 from Grover Hill. Mr. Dunderman will be emailing you those pictures that were taken by us on public road ways around both towns. There will be 2 emails from him with myself cc in them. Please also add our email to the file too.

This shows a huge difference in satellite view versus how we see them everyday. These wind turbines are towering over these two communities like skyscrapers in a rural area. That project ends 2 miles west on 114 from Grover Hill. But Latty Township that Grover Hill is located in already has windmills located at the end of Blue Creek Project that started this new project of continuous development of more wind turbines that are moving across Paulding County.

As a life long community member and life long residents of Paulding County. We feel there are enough wind turbines in our county and most differently don't wanna live with them towering over our little rural community of 500 people or less. Both Scott and Haviland are smaller than our community in population.

We feel our community should have a actual say in this project being forced on us by the wind company and local landowners who are just looking to significantly increase their annual income at the communities expense.

Sincerely;
Ginna Hinchcliff & Chase Dunderman
