Reaching out regarding our concerns on the solar panel project coming to our area

We are very concerned for the health of human life as well as what this will do to our habitat, WE do not like the thought of these panels that carry electromagnetic waves from the panels that cause radiation not to mention the exposure to toxic pollutants that will go into our land and waters. I feel this is not a good fit to all these small communities that already struggle with poor drainage and titles that cause major flooding in our areas, please take this into consideration

Thank You Danny Kerns
