These sunless days of winter remind me of what a scam this proposed solar project, Birch Solar is. The solar panels won't be producing much electricity on these numerous sunless days, but what they will do is destroy our township, prime farmland and affect the lives of so many in negative ways. This project is insane. It provides no benefit to us here in Allen and Auglaize County. How dare BP/Birch Solar and some East Coast Corporation get rich off of us? BP and East Coast Corporations can put their solar panels on roofs where they belong. Please don't take our farmland and destroy our lives. I have grave concerns for future generations also if these solar fields go in. Decommissioning plans are too vague. Ohio Power Siting Board please deny this project. Thank you!
