Re: **Clinton Substation Expansion**
Ohio Power Siting Board Case No. 21-0679-EL-BLN
Notification of Clinton County SWCD & Engineer SWPPP Authorization

Dear Chairman French,

The Dayton Power and Light Company doing business as “AES Ohio” hereby submits this notice to inform you of the agency approval to satisfy Condition 2 related to the November 24, 2021 Ohio Power Siting Board (“OPSB”) approval of the above referenced project. Via email correspondence, on January 28, 2022, Clinton County Soil and Water Conservation District (“SWCD”) and the Clinton County Engineer determined that the above referenced project’s stormwater prevention pollution plan (“SWPPP”) was appropriate (Enclosure).

Please feel free to contact me if you have any questions regarding this notification letter.

Respectfully submitted,

ss:/ *Randall V. Griffin*

Subject: RE: AES Ohio - Clinton Substation Expansion - Erosion and Sediment Control Permit

You don't often get email from jsneed@clintonswcd.com. [Learn why this is important](#)

Jerry,

Looks like you took care of those items. Everything looks good.

Jason Sneed

Jason,

Thank you for the review. Attached are drawings with your comments addressed in the following manner:

1. Notes were added to the plan sheets stating that the Clinton Soil and Water Conservation District has the right to inspect for storm water and erosion control.
2. A sheet has been added to the drawing set that specifies temporary and permanent seeding rates and mixtures (from ODNR).
3. The skimmer Dewatering Device detail has been updated with data from the manufacturer's website to improve resolution. Higher resolution images of the ODNR details for rock outlet protection and silt fence were included to improve readability.

Please let me know if you need anything else. Thanks again!

Jerry

Subject: RE: AES Ohio - Clinton Substation Expansion - Erosion and Sediment Control Permit

Jerry,

A few things that I found.

1. There needs to be a note on the plan that says the Clinton Soil and Water Conservation District has the right to inspect for storm water and erosion control.
2. Needs to have seeding rates and mixtures. Permeant and temporary.
3. The skimmer Dewatering Device, rock outlet protection, and the silt fence drawings and text are blurry and readable. I tried zooming in and printing.

Please address these issues.

Thank you,
Jason Sneed

Subject: AES Ohio - Clinton Substation Expansion - Erosion and Sediment Control Permit

Good morning Jason,

We spoke on December 15th regarding the subject expansion and the submittal required for this permit. As discussed, attached is the SWPPP for construction which includes the Erosion and Sediment Control drawings for the project. In addition, I have copied Adam Fricke with the engineering department as you instructed. Please let me know if additional information is required in order to process this permit request. Thank you for your help in this matter.

Sincerely,

Jerry L McGraner, PE,PLS
