Subject: Grover Hill Windmill Project

I don't feel comfortable speaking at the hearing tomorrow but I would like to reiterate our profound opposition to this windmill project.

I believe this project will be a detriment to the community as a whole. Some of the massive turbines will be across the road from our home - basically, in our 'front yard'. There are a lot of unknowns associated with these monstrosities and there are also a lot of negatives that we DO know. My husband and I have lived here all of our lives. I shudder to think I will have to spend my retirement years having to deal with flicker, noise, and who knows what other ill effects they will have.

I also believe this company thought that because we are a small rural community, that they could ram-rod this through with little opposition. This company has already exhibited underhanded behavior and I don't trust them one bit.

Paulding County is a sparsely populated county. Why do the turbines have to be erected outside of our community? Surely there are more nonresidential areas where they could be located.

Other concerns:

- *Wildlife endangerment

- *I have always wondered how they would hold up to tornadoes and straight line winds. One blade landing on your house or property would be devastating.

- *Negative impact on over the air televisions within 6 miles of the project.

- *They are not green at all. They contain gallons of oil and will be difficult to dispose of when they no longer work.

- *My electric bill will not improve. This does not benefit the average citizen in any way, shape or form.

- *I fear property value will be reduced and it will be impossible to sell if this project is approved.

Thank you for hearing these concerns.
