RE: Chipmunk Solar LLC Project # 21-0960-EL-BGN

Dear Ohio Power Siting Board:

I am writing in opposition of the Chipmunk Solar Project aka Project # 21-0960-EL-BGN.

I've been reading the other Public Comments that have been sent to you and many of them are from people that do not reside within even 10 miles of the project. In fact one claims that he is a resident of Pickaway County, and he is not. He lives in a completely different county and owns the farm ground in Pickaway County. Eighty percent of the landowners that have signed up are absentee landowners. They rent the ground to farmers. There are also land owners whom signed up and now want out of their agreements because of the negative information they have learned since signing up their land, but are being told by the Chipmunk Group that they are not able to let them out of the project. The farmers in our dominantly agricultural community whom rent the ground for farming will be harmed. Many are losing 100s of acres to this project.

This project is being proposed to be built in the heart of our Pickaway County, OH community and will be very close to our Westfall Elementary, Middle and High Schools. The proposed sites will surround the main corridor of travel to and from our schools. High school students and buses sharing the roadway with large construction equipment and the increase in traffic from this construction will more than likely cause issues for the safety of our students not to mention local residents.

Please take the concerns above into consideration when deciding on the application for the Chipmunk Solar Project. Please vote "No" to approving their application.

Sincerely,

Chelsea Glick
