Dear Ohio Power Siting Board:

I recently learned of the proposed Fountain Point Large Scale Solar Facility (Case Number 21-1231-EL-BGN).

Below is a list of reasons I oppose this facility:

Infrastructure for more solar projects to blanket county and surrounding counties for 45 years with a sea of solar

Panels and miles of chain link fence with razor wire

Loss of property value

Flooding/drainage issues

Loss of wildlife and habitat (Bald Eagle, Deer, Bats, Coyote)

Degradation and loss of fertile agricultural land

Noise from Inverters

Toxic runoff from damaged photocells

Heat Islands

Increased electric bills (not a single watt from the facility will go to Logan County Electric Coop)

Terribly inefficient especially with Ohio climate. (land area required for solar to replace just ONE of Ohio's 17 fossil fuel power plants would encompass 173 sq. miles)

For the reasons listed above, I oppose this project.

Sincerely,
Chad Carpenter
