Subject: Opposition to Chipmunk Solar in Pickaway County

Case #: 21-0960-EL-BGN

To whom it may concern,

I am writing to express my opposition to the Chipmunk Solar Project in Pickaway County. I live at 13530 Williamsport Crownover Mill Rd, New Holland, OH 43145, land partially in Monroe township, an area that will be directly affected by this project. In addition to the unsightliness that this project will bring to the rural landscape that we have all moved here to live off of and enjoy, this project will forever ruin any agricultural potential of this land. The Chipmunk Solar Project insists that the ground can be returned to agricultural purposes at the end of the 30 years, but I urge you to see through this; talk with soil scientists to see how this is simply not true. When we moved into our house, we did so with the intentions of raising our children in a rural, agricultural community. We now have an 8 month old daughter, and now I fear this may never happen because people who will NOT be directly affected want to put up giant solar panels that will ruin our land that people's livelihood depend on. I truly believe the only people in support of this project are those who will not be affected at all by its current or future impacts. Please consider those of us who WILL be impacted by this decision and vote against this project.

Thank you,
Taylor Peters
