Persons on Ohio Power Sitting Board - J

I am sending this letter in opposition to the Chipmunk Solar Project Case # 21-0960-Elr BGN. For some reason your group has decided to invade and destroy our rich farmland. Well guess what! We didn't invite you here and we don't want you here.

I am a lifetime farmer of our family farm and owner of some of the best farmland in our agriculture community and country. In the area of our Mukhlerberg, Jackson, Monroe & Lancaster Townships are the very best of producing farms. We raise crops, livestock of all kinds, grains and plants that in turn are responsible for helping to feed our country. Our production provides many different things such as clothing, oils, butter and home needs, ethanol for fuel, poultry and eggs, all choices of meats, trees and woods for building and protection of our wildlife, better water & oxygen to drink and breathe, and too many others to mention.

I am very upset that you would pick our area to destroy by scraping off the very best soil from the top of land on our farm. You know very well, after your lease is up, that soil is forever destroyed and will not grow anything and cannot be replaced. Why don't you tell our people the full truth while you're flashing your big money in their face?

UCO

My land is listed with the Ohio Historical Family Farms and have 6 generations involved. We have spent our whole lives, and time, clearing, building a Homestead, loving, sweating, sometimes crying, playing and enjoying our efforts in life to pass on the land to our next generations.

I certainly do not want my family to have a surrounding view of perfectly beautiful and productive agricultural land turned into a vast ugly field of metal panels, poles and lines.

Many of our neighbors are family farms and homeowners. They feel the same way. We don't want to be encompassed in a circle of metal that you have planned for all the townships around us.

No amount of money would change my and many others' minds. Namely our friends and neighbors. My ancestral land is in my blood and is me.

"Farming is not a Job - It's our way of Life"

When you and your associates arise each morning for breakfast, take a break during meetings, having an evening meal; STOP and think about where the food you're eating or clothes you're wearing; maybe the fuel in your car to get to work etc. Really come from. It's all from our farmland that you're planning to ravage and destroy. This will also affect your family too! Not just ours and our neighbors.

Remember this well ;
No Farms - No Food

So go somewhere else and ruin
their land. Maybe they will believe
your lies.
