Dear Ohio Power Sitting Board,

I would like to go on record that I STRONGLY oppose the Fountain Point Solar Energy project case number 21-1231-EL-BGN.

This project will surround my house where my husband and children live. We moved to this area to raise our children in this rural area and be surrounded by beautiful farm ground and wildlife. We love to be outside when it's nice and deer will go right in our back yard. If this solar farm project goes through, then it will impact our wildlife habitat. They will not come around since it is interfering with their home and food source.

My husband and I are trying to build on to our home, and in order to do that, we had to get permission from all our neighbors to add on, per our township, when we own our property. It is not right that we had to jump through all these "hurdles" and farmers don't need to ask permission from the people that are going to have to be next to them everyday for the next 45 years. You cannot guarantee that this project won't affect our home value, when a lot of people will not want to live around here if solar farms come in. People do not want our rural area turning into an industrial zone, especially with chain link fences and razor wire.

This project is also taking away from our farmlands. Our farmers benefit our community with their crops they produce. The energy from the solar panels won't even go to Logan county.

I appreciate the opportunity to be able to state my opinion opposing the solar energy project and I hope you take it into consideration.

Thank you,
Alexandrea Taylor
