**Subject:** Solar farms in Ohio.

I am against solar projects in Ohio, especially Union County where I reside. We have not been told much at all about the projects. They just came in offering money to land owners. Then they are dangling money in front of the schools and local governments, and saying without a PILOT, the projects may not be viable. So be it. Make them pay the same taxes as everyone else. Also solar isn't exactly green. They are made of rare earth elements that come from foreign sources and are toxic. Solar in Ohio isn't very efficient as they would be in say Arizona. Crops in the fields take tons of carbon out of the air yearly. Solar does not

Kind Regard
