Re: In the Matter of the Application of Duke Energy Ohio, Inc., for a Construction Notice for
the 138kV/345kV Byer Steel Project
OPSB Case No. 22-451-EL-BNR

Dear Ms. Troupe:

Duke Energy Ohio, Inc., (Duke Energy Ohio) is filing this Pre-Application Notification Letter in accordance with O.A.C. 4906-6-03(A).

Duke Energy Ohio proposes to relocate and rebuild approximately 0.05 mile (287 feet) of 138 kilovolt (kV) transmission line and a total of approximately 0.13 mile (665 feet) of 345-kV transmission lines connecting from the Terminal Substation south to poles of Byer Steel, located in the City of Cincinnati, Hamilton County, Ohio. The new relocated structures will replace Duke Energy's aging structures as the existing structures were assessed during a streambank stabilization and remediation project that occurred in the vicinity of the project area.

This project was previously filed with OPSB as PUCO Case No. 18-1593-EL-BNR Construction Notice for the 138kV/345kV Mill Creek Remediation Relocation; however, due to outage conflicts and budgetary constraints, the project was put on hold and rescheduled for construction in 2022.

Construction is scheduled to begin October 1, 2022, pending approval of this Construction Notice. The Project is anticipated to be completed and in service by June 1, 2023.

Sincerely,

/s/ Jeanne W. Kingery

Jeanne W. Kingery
Associate General Counsel
