This is a Petition representing Ohio Residents that are AGAINST Ohio Power Siting Board case # 21-0960-EL-BGN

We the undersigned believe the following statements to be true and it is our desire that the Ohio Power Siting Board deny approval for Ohio Power Siting Board case # 21-0960-EL-BGN.

There has NOT been an established basis of need for the facility's electric generation and transmission.

There has NOT been a realistic and accurate nature of understanding to the environmental impact within the rural community.

There is NOT quantifiable data established to determine whether the facility represents minimum adverse environmental impact and there have been NO alternative solutions proposed.

The facility is NOT consistent with regional expansion plans for the Ohio power grid. There is also NOT evidence that the facility will serve the interests of electric system economy and reliability.

This facility does NOT serve the public interest. This facility does NOT serve public convenience. This facility does NOT serve public necessity.

The facility's impact on the continued agricultural viability of any land has NOT been substantiated and evidence of any such actual land viability post facility conversion has NOT been substantiated.
