Dear Mr Butler:

As an Allen County property owner of Beornheard Farms LLC, I support the Birch Solar Farm project. Wind and Solar power is a clean, efficient and inexpensive source of energy that creates jobs, and tax revenue for our schools and local governments and is farm friendly. As a property owner, the government should not dictate what I do with my land.

Wind and solar infrastructure is no different then permitting large corporate farms spreading manure on fields and building large animal facilities and should be treated the same without overburdened regulations that effectively make it impossible to develop wind and solar.

Sincerely,

Garry B Mosier
