**Construction Notice
138 kV/345 kV Byer Steel Project**

Dear Madam:

Duke Energy Ohio proposes to relocate and rebuild approximately 0.05 mile (287 feet) of 138 kilovolt (kV) transmission line and a total of approximately 0.13 mile (665 feet) of 345-kV transmission lines connecting from the Terminal Substation south to poles of Byer Steel, located in the City of Cincinnati, Hamilton County, Ohio. The new relocated structures will replace Duke Energy's aging structures as the existing structures were assessed during a streambank stabilization and remediation project that occurred in the vicinity of the project area.

This project was previously filed with OPSB as PUCO Case No. 18-1593-EL-BNR Construction Notice for the 138kV/345kV Mill Creek Remediation Relocation; however, due to outage conflicts and budgetary constraints, the project was put on hold and rescheduled for construction in 2022.

In accordance with O.A.C. 4906-1-01 Appendix A, we are required to prepare this Construction Notice for the Ohio Power Siting Board and, in compliance with O.A.C. 4906-6-07, we are hereby providing you with a link to an electronic copy.

A copy of the application has been placed at the main office of Duke Energy Ohio at 139 E. Fourth Street, Cincinnati, Ohio 45202, and at the offices of the Ohio Power Siting Board, 180 East Broad Street, Columbus, Ohio 43215.
