**Construction Notice  
Collinsville Transmission Line Relocation Project**

Dear Madam:

Duke Energy Ohio proposes the relocation of approximately 430 linear feet of Circuit 3281 (College Corner to Trenton) and Circuit 13803 (College Corner to Hutchings Station), both being 138-kilovolt (kV) transmission lines, in support of the proposed expansion of the existing Collinsville Distribution Substation. The proposed relocations, within existing alignment, will require the installation of four steel monopole structures on foundations in order to terminate the transmission lines on new positions on proposed take-off structures within the expanded Collinsville Distribution Substation.

The Project is located east of Richmond Road north of Trenton Oxford Road, in Milford Township, Ohio, adjacent to the existing Collinsville Distribution Substation Station.

The proposed relocation of the two 138-kV transmission lines is a part of the Collinsville distribution substation expansion project that will allow for the installation of additional equipment to improve reliability, improve Duke Energy's electric transmission operation flexibility, and improve service to existing and future utility customers in the service area.

In accordance with O.A.C. 4906-1-01 Appendix A, we are required to prepare this Construction Notice for the Ohio Power Siting Board and, in compliance with O.A.C. 4906-6-07, we are hereby providing you with a link to an electronic copy.

A copy of the application has been placed at the main office of Duke Energy Ohio at 139 E. Fourth Street, Cincinnati, Ohio 45202, and at the offices of the Ohio Power Siting Board, 180 East Broad Street, Columbus, Ohio 43215. The Application is also available on the Duke Energy Ohio website, at: [www.duke-energy.com/Collinsville](http://www.duke-energy.com/Collinsville) and on the Ohio Power Siting Board's website, at: [DIS - Case Record for 22-0468-EL-BNR \(state.oh.us\)](http://DIS - Case Record for 22-0468-EL-BNR (state.oh.us)).
