Scioto Farms Solar Project  
Case number 21-868-EL-BGN

Dear Ohio Power Sitting Board,

This will be my second summer of working on a family farm in Circleville. Each morning when I leave for work, I get to view the beautiful scenery of the fields on my way. The beauty of these fields truly demonstrates the amazing work local farmers do. When I heard of this solar project, it concerned me. The panels being put into the fields would destroy the amazing land and be devastating to agriculture. If this solar project were to go into place, the fields will most likely never be used for agriculture again. As a farm hand I take a lot of appreciation for my job. In addition to this, I have multiple co-workers who are younger than me using our job as a learning opportunity. With these panels installed, we would lose these opportunities. The next generation may not have the access to agriculture as we do now.

From a local, a worker, and an advocate please reconsider this solar project. Our farmland should be saved. There are other places to install the panels.

Sincerely,  
Sterling Jarvis
