WEST

Owners: David & Mary Tong  
Rental for 2 of our sons  
Craig & Michael Tong  
2347 TR 254, Arcadia, OH 44804

David Tong systematically tiled the back of the Tong property by the Gano Farm in Dec. of 2020. We used 4 inch tile & the cost was \$ 22,861.78.

Tong Property Line 1,320 Feet Industrail project 60 foot setback these are the rules we follow

There are 4 Main tiles are located in this field  
Tong 8 inch, a 10 inch, the 24 inch & the home discharge. Each main will require 25 feet setbacks on each side of tile which equal 50 ft. No laterals can be damaged & Mr. Gano believes they are using ground penetrating radar to locate all these tiles.

John E. Fox Ditch, begins East Branch of the Portage River

Large Deer herd gather here. We have counted as high as 42 head.

Mellott Woods Approx. 700 feet span South side of Gano property

No heavy equipment can cross this 24 inch, outlet tile. It will crush it or create a belly & water be impeded. This fact goes for all tiles in these fields.

Tong 8 inch has approx., 1,300 feet of travel across the farm  
24 inch is approx. 660 feet across the farm  
Home drainage starts at home & travels all the way to the 24" tile  
10" tile is a mystery & needs GPR to fulling understand its travel

24 inch Main  
Replaced March 29, 2021  
Cost \$ 13, 845.00  
Hancock Soil & Water accessed appox. 127 acres drain here= just short of one square mile

Papers on back explaining each individuals ac & their cost to reimburse Mr. Gano.

EAST

Jim Gano, Colorado 37.7 Acres

Boes Property Line, township rules, Industrial 60 foot setback

No Trees or shrubs should be planted in the fields roots will grow into tile & plug them.

Owner's Home for Sale on Gano Property TR 218, Fosterla No Sale, Solar issue

border for 1/2 mile

Here's your invoice! We appreciate your prompt payment.

Thanks for your business!  
Boes Brothers, Inc

Bill to  
JIM GANO  
GANO FAMILY FARMS  
4115 BRAIDWOOD DR  
FT. COLLINS, CO 80524

To be able to fix or replace they  
will need 25ft on each side of tile = 50ft. total  
8" 10" & 24" tiles are all mains  
Home drainage is also considered a main.

15" DUAL WALL TILE	\$13,200.00

Total Acres Benefitted

527.3

Acres benefitted measured from parcel data acquired from the Hancock County Auditor's Website

Negatives of Living Next to Solar Industry & reason to not have them installed...

1. Harmful to your health- electromagnetic radiation & shortened life span
2. Habitat degradation - displacing large numbers of animals & bird deaths
3. Solar industry is unsightly
4. Creates negative value on properties
5. Disrupts the harmony in a community, neighbors no longer respected
6. Flooding
7. Noxious weeds
8. Lights on at night will effect growing crops, can't mature or set pods
9. Noise is constant
10. Fields catch fire
11. Dangerous during violent storms
12. Currents have carried & known to kill animals
13. Arcadia can no longer grow when pressed against a town.
14. Producers of carbon
15. Once green growing crops, oxygen no longer produced
16. Increases temperatures in areas that have them.
17. Our fire department doesn't want to deal with a hazardous fire.
18. Farm land ruined & gone forever
19. Hazardous chemicals carried into nearby streams
20. Panels have a short life span, wasteful
21. Panels have no recycle value
22. Fills our landfills
23. Proven for decades not efficient
24. Waste of natural resources
25. Pollutants in water supply
26. Animals drink contaminated water in the streams
27. Zero energy produced at night
28. We live near the lake, mostly cloudy days, not reliable
29. This is the historic Black Swamp, no tiles can be destroyed.
30. Glare to drivers & community
31. Expensive to produce
32. No one wants to build homes near them
33. Clearing trees
34. American Bald Eagle has been seen here for many years now
35. Eagles are now part of this family, awesome!!
36. Chemicals flow directly into John Fox Ditch, beginning of Portage River
37. Chemicals flow directly into Charles Good Ditch, then onto Portage River
41. Land bought with investment from foreign money
42. Ohio's agricultural land disappearing at an alarming rate
43. Dust accumulates on panels causing loss of production
44. Requires large amount of water to clean panels
45. Cause stress on our water wells
46. Wrong climate for solar panels
47. Won't produce with snow or ice on them
48. Technology is rapidly changing & will be outdated by installation time
49. Resources used in them are mined & a limited supply
50. China is a big producer of panels, enrichment of communist country
51. Arcadia School in good financial shape
52. Fire Department against it
53. Hardin County leasers regret letting their land become solar, hindsight
54. Washington Township was already zoned Agricultural
55. Washington Township is now an exclusionary zone from wind & solar
56. Under 1,000 acres, not economical & can never increase

We could come up with a bunch more reasons that this is not a good plan for us, please stop this project in Washington Township, Arcadia, Ohio.
