I am a lifelong resident of Grover Hill. I strongly oppose these windmills. The windmills as a whole only benefit a handful of people in our community. The farmers (who already get tax free income), the school (who already receive levy money from my pocket), and the library and police dept. (these are already funded) When the first set of windmills went into Paulding county everyone's electricity bill went up. So the community as a whole pays more, puts up with the sounds and sight of these constant shadows and flickering of lights at night. We put up with our T.V. signals interrupted, we put up with the health issues of being around all the electromagnetic frequencies emitted from the generators (short of breath, dizziness, heart flutters...). We see our wildlife are staying away from the area. We see our rain storms in the summer go around us all the time because of these windmills. THEY ARE UGLY, LOUD, ANNOYING, BAD FOR OUR WILDLIFE, BAD FOR OUR HEALTH, RAISE MY ELECTRIC, AND LOWER OUR PROPERTY VALUE.

So now I have to pay with my electric bill, my life and health, my property value, my hunting opportunities, my annoyance everyday hearing and feeling these things run around our community. These have never been tested this close to people. The health effect of these will be noticeable. I do not want to be a lab rat experimented on. These belong in the ocean or desert away from families. For all that I have to pay for these. Why should I be forced to pay for these and live with them. Our bills go up to fund the project and the electric company gets FREE generation and expansions of their PRIVATE business. Why are we paying for a private business to profit more? Where is this money going?
