Subject: case #21-0164-EL-BGN & "Objection to Harvey Solar 1"

To whom it may concern,

I am asking you to please decline the Harvey Solar project. It's very important to keep the land for actual agricultural farming. We need the crops and livestock to keep our communities fed. The land will be destroyed by the solar panels and as I've read, there's no real plan into disposing the panels once they are no longer usable. Where will that toxic waste be held? We don't want to hear the plan will be figured out "in the future" we want a plan NOW if this is going to be approved!

I've asked before, if the pilot plan helps the community please tell me how!! Where is the money that is supposed to be used to fix roads, fund schools, police, fire department and so on going to come from?? Are property taxes going to be increased for those who do not have the solar panels to fill in the void for those solar farms? Would that be fair? Not at all. Please drive around the area where the project will be located and see the flooded fields and yards. I want to see facts and figures.

What happens if one field is so flooded it takes down a panel and then another one and another just to create a ripple effect which could then cause others' lands to be affected.

For anyone on the board, do you live in Ohio? Do you see the sun very often? If you say yes and yes, you have not lived in Ohio long enough. I've lived in Ohio pretty much my whole life, it's not a sunny state.

For those landowners who are going to have the solar panels, can you please tell me why you are supporting this? Other than getting money and not paying taxes? I don't want to hear anyone saying anything about green energy because those landowners who support the panels are only looking at the green in their pockets. We all know that, including the board, the government and anyone who likes money too.

Please for the love of nature and those people who love nature, please do not allow these solar panels to ruin more land in our state.

Thank You
