I would also like this to be under the one in the Williamsport area. Please stop destroying our land, nature, and wildlife habitat with these solar landfills.

I do not want to see industrial solar here or there, I do not want to see it anywhere.

Thank you,

Richard Donley

Enter your question or comment	<p>I would like to ask that you end all industrial solar projects on private land. There is a solar landfill currently being built on Westfall road in Ross County that is destroying the country landscape that I love. Instead of seeing crops or wildlife as I drive, now I am seeing a landscape being littered with hideous solar panels. Please stop allowing our countryside to be destroyed with solar landfills and wind turbine wastelands. Stop destroying rural Ohio with these inefficient, expensive, and ghastly forms of energy. We in the countryside don't want our scenic beauty being destroyed with these so-called "green" energy projects. There is nothing "green" about seeing thousands of acres being destroyed for solar and wind projects. If you want to build efficient energy, then build a nice nuclear power plant that won't destroy thousands of acres of our cherished land. Please do not allow any more of these landscape destroying solar and wind projects, and please disband the Ohio Power Siting Board.</p>
