As a resident of Shawnee and living on Yoakam Road, I have been following information and attended a meeting on the Birch Solar Panel project they are trying to approve and start building. I firmly believe the location is wrong for the Solar Panels and the damage to the land they would be built on, the decrease in value to our homes, not receiving any lower cost in electricity the panels would produce, no money given to Shawnee School. There has been no detail information regarding the construction process of the build. We have been told once the panels are no longer working after their length of time, the field will never be able to be used to plant crops again. There are many acres of ground that do not have housing near them that would seem to make a better location if solar panels are supposedly a new idea for creating electricity.
