I am very opposed to the solar panel project for Franklin township Columbiana county. I grew up in the city and moved to the country to raise my children and enjoy the life and views of God's country. If this project happens 3/4 of my property will be surrounded by solar panels and this ridiculous jail type fence. My children have often sat outside and watched wildlife including bald eagles just outside their back door. I am concerned for wildlife, weeds, and my well water. I maintain most of our family's food supply with my garden and know that either spray or weed seeds blowing over are going to make that more challenging. I strongly beleive this project will impact my familys country lifestyle enough that we will be forced to uproot and move. The fact that solar power is not the most efficient way of producing power and this area particullary does not always get sun makes it even more frustrating to alter so many peoples lives for something that is not that benefiting.
