## Power Sitting Board Case 20-1605-el-bgn

lesnshannon@gmail.com>  
ng@puco.ohio.gov

Fri, Jul 8,

and Gentlemen, It has come to light that B.P. Lightsource is once again trying to usurp the power of the people and disregard the voice of the and Allen Counties. My wife Shannon and I, Leslie, along with over one thousand landowners as members of Auglaize Townships United stop the construction of wind towers and solar panels on our fertile farmlands. Not only are they eyesores and sound annoying but the killers of thousands of birds and insect eating bats. They harm the habitat for the woodland creatures while ensuring that the farmland cannot be used to feed an increasing population. The panels not only increase global warming through reflection of heat back into the air but are produced in China with the help of slave labor. Have the American statues and monuments are and were torn down in our country due to this very same premise? But again, perhaps only a certain race is exploited. The Uyghurs who are forced into internment camps produce the solar panels which are used in the construction of the solar fields in China. They turn slaves to the Chinese and this is welcomed by the solar companies. Cheap labor is the goal for this produces huge amounts of capital which is then used by the greedy and this includes B.P. Lightsource along with Birch solar. These so-called executives do not have to put up with the degradation of the land, falling home and land values, noise and increased heat due to the return of radiation into the atmosphere through reflection. These greedy executives care about profits and even Countries away. They dump their refuse in our once productive fields and flee the scene with taxpayer funded subsidies in bulging pockets. If there is money to be made for our schools, it's for the children they shout but government subsidies, thanks to the taxpayers are actually less. If more money provided locally means less of a return from the state and federal government of our own tax dollar due to this thing called equity, then why are we donating our own money to other school systems with this undertaking. As for myself I wonder how many of these so-called save the planet activists have their electric vehicles line their own rooftops with the Chinese built solar panels. Please place my wife Shannon and myself, Leslie Kubinski on the list to stop the construction of solar panels and wind turbines in Auglaize and Allen Counties along with the over a thousand members of Auglaize Townships United. Thank you for listening and reading.
