Director White : Thank you for the rules that will mitigate environments for residents that have spatial concerns of encroaching solar facilities. I would suggest that the state should appoint an inspector to ensure that all facilities are constructed with safety for residents first in mind and an acceptable and functional environment with proper aesthetics that meet our community values. We would also note that an inspector needs to ensure that removed soil be properly stored and recorded, so that when decommissioning, proper and orderly restoration to original composition is completed. Also we feel that fines of monetary value be written into ORC to constrain the breaking of rules by developers. We would also mention that all residents in our project were not notified by mail and would like a rule that necessitates that notification must happen so all residents have the ability to attend hearings. We hope that you will consider these proposals and we thank you for the new rules.

Sincerely CC/HCCCASF 1200
