Re: OPSB Case No. 21-1231-EL-BGN Fountain Point Solar Project

Dear Ohio Power Siting Board:

I am sending this letter to express my opposition to the Fountain Point Solar Project.

We are a historical and agricultural community. A gemstone in the great state of Ohio. The backbone of this community has always been agriculture; it is the blood that runs through the veins of this community. The air we breathe the land that we inhabit is critical to the breadth of this community. They are the elements and the quality of life that we enjoy - given to us by our forefathers in the constitution. They reflect our God given rights – pursuit of happiness. Without agriculture, it is not possible to have banks, markets, stock markets, it is the foundation of a stable economy. Without agriculture, where is the food to come from? Some building where the plants never see the sun? Never breathe the fresh air? Generations of farmers have farmed this land surrounding us. They are the farmers who have contributed to put the food in the mouths of the citizens of this nation. Food on your tables!

We are asking for help to preserve our way of life. We need our elected officials not to turn their backs on us for money's sake but to do as they promised and listen to the people. These projects will strip away the land. Today, many of us walk each day in the footsteps of our grandfathers, great grandfathers, and great, great, grandfathers. Some have had ancestors who lived here in the late 1700's. Our family's blood, sweat, and tears are ingrained in the soil of the land that surrounds the countryside of Logan County.

Please do not allow our lives and land to be stolen, our land is a responsibility to the country, it is sacred ground and should be fought for. The land is the inheritance from our fore-fathers and on loan to us today. It is imperative that it be preserved for future generations. Only with a deep, inherent love for this land can preservation occur. Heaven on earth is under our feet and it is the land that we live on.

This project does not meet the public interest, convenience, and necessity and should be denied.

Regards,
