

Re: OPSB Case No. 21-1231-EL-BGN Fountain Point Solar Project

Dear Ohio Power Siting Board:

I live in Logan County, Ohio and I oppose the Fountain Point Solar project for the following reasons, Case Number 21-1231-EL-BGN.

The solar facilities would devalue resident's properties due to present health risks from the installation, electromagnetic exposure, visual impact, solar panel glare, drinking water supply, poor water drainage management, continuous noise during the solar production (generator noise), and habitat degradation. No matter the excuse, the visual picture of these panels will lower property values because most buyers would not want to live near or next to them. This area is zoned agricultural and residential, not commercial zoning.

Recent evidence today reveals that there is a negative impact on property values from large scale solar facilities than presented by solar developers which is a major negative impact on the community.

This project does not meet the public interest, convenience, and necessity and should be denied.

Regards,

Abby Pennington
Jefferson Twp.
