Re: OPSB Case No. 21-1231-EL-BGN Fountain Point Solar Project

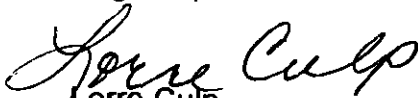

Dear Ohio Power Siting Board:

As a property owner in the Fountain Point Solar Project, I wholeheartedly oppose the project.

The possibility of fires resulting from or intensified by PV systems may trigger concern among the general public as well as among firefighters. In the event of a lithium-ion battery catching fire, it is important to note that such a fire reaches very high temperatures, produces toxic gases and is inextinguishable which is very dangerous for homes that will be within 300 feet of these solar panels.

This project does not meet the public interest, convenience, and necessity and should be denied.

Regards,

Lorre Culp
