I would like to express my deepest regret that the governing body of government is selling almost 2,000 acres of prime farm ground to a solar company that will destroy this area with toxic glass that will poison our wells, cause flooding of all the homes. We were also told that the glass cannot be recycled because of the poison in them & won't last more than 10-15 years. So much for protesting & taking care of our land & environment. Our children & grandchildren will have nothing. What a desecration of good farm land, and country!
