Subject: Re: Muddy Creek Transmission Line Replacement Project

To be a bit more specific, I would like for Duke to consider moving pole G7-96 approx. 60 feet to the southwest so that it would largely be obscured by trees and would lessen the financial harm to homeowners in the community.

Hello Matt. I also filed a comment with PUCO, but I do not see it visible on the website. I am the property owner behind Mike and the pole in question would be located on my lot. Can you confirm this comment was received? We would appreciate the opportunity to identify alternatives to the current plan.
