<b>Enter your question or comment</b>	<p>The more information that we get, the more we are convinced that solar panels are not a good thing. If Amazon stopped selling them because of concerns of fires, why would we even want to deal with them. If the companies were actually paying to place them in these fields, instead of getting money from the government to do so, I would have an easier time believing that they are a good thing. They are getting money and energy credits. We as the citizens of this area are getting nothing but eyesores. We feel very strongly that this project should not go forward.</p>
