Dear OPSB,

As I personally read all the public comments beginning May 1, 2022, thru September 14, 2022, here are some statistics:

Since May 1, 2022, 202 (two-hundred and two) public posts are AGAINST the project while 27 public posts (twenty-seven) are FOR the project.

Since July 15, 2022, 37 public posts are AGAINST the project while 2 public posts are FOR the project.

There were also 2 or 3 posts that were neither for or against the project.

Also since July 15th, one post included 844 signatures of people AGAINST the project while another post included 60 signatures of people FOR the project.

In addition, within the last four months, every public office holder that has publicly made a written statement on this OPSB website has been AGAINST the project. This list includes all Shawnee township trustees, all Allen County commissioners, Allen County auditor, Allen County engineer, and Allen County treasurer. It also includes thoughtfully written statements opposing the project from Ohio State Representative, Susan Manchester, and Ohio State Senator, Matt Huffman.

What is quite clear is that the majority of people in Allen and Auglaize County overwhelmingly oppose this project. Considering all of the public comments referenced above, those against this project are somewhere between 85% and 95% of the voting population in these counties.

Solar farms can be a useful energy source, but they should be placed in locations where the population density is relatively smaller than Allen and Auglaize County. The size and proximity of this project is simply too large and too close to the dense populations of Allen and Auglaize County.

I hope and pray along with many others residing in Allen County and Auglaize County that you will honor the people who are already heavily invested in their community and vote against this project. I believe Lightsource BP can and will invest elsewhere with other projects with great success, hopefully in more suitable locations.

Landon Neuman
