I wanted to reach out a final time to express my opposition in the Birch Solar 1 project. Not only this bring a huge eyesore for our community I feel Lightsource BP has not done anything to help gsin community support. The way they have handled this puts me more at ease for this proposed project. I feel they have not done a good job addressing any concerns the community has. I have previously stated my concerns, the number one concern is the health of my family. I already have a child with some health concerns and not sure if a solar farm this close to our residence would have a negative impact on him. Of course you can research this all you want and find studies to go both ways. Flooding on the area is also a major concern of mine as this area already has some flooding issues. I just feel a project this massive is not right for this highly populated area and affects too many people negatively. This is not responsible solar.
