## **EXHIBIT 1**

### **INFORMATION AND COMMUNICATION SERVICES, LLC**

#### **D/B/A ICS TECHNOLOGY GROUP**

#### **DESCRIPTION OF SERVICES**

Information and Communication Services, LLC d/b/a ICS Technology Group by this Application seeks authority to provide resold local and interexchange telecommunication services to the public by initially reselling services obtained from and utilizing facilities provided by facilities-based carriers. At this time, the company has no plans to install facilities in the State of Ohio. Information and Communication Services, LLC d/b/a ICS Technology Group will be utilizing the provisions already in place and provided by the underlying carrier. For local exchange service, Information and Communication Services, LLC d/b/a ICS Technology Group will mirror the existing local calling areas of incumbent local exchange telephone companies.

**EXHIBIT 2**  
**INFORMATION AND COMMUNICATION SERVICES, LLC**  
**D/B/A ICS TECHNOLOGY GROUP**  
**DESCRIPTION OF PROPOSED MARKET AREA**

The Applicant intends to provide interexchange services on a statewide basis and intends to provide local exchange in areas served by AT&T Ohio. A listing of the Proposed Market Area (PMA) is attached to Exhibit 20.

**EXHIBIT 3**  
**INFORMATION AND COMMUNICATION SERVICES, LLC**  
**D/B/A ICS TECHNOLOGY GROUP**  
**EXPLANATION OF HOW THE PROPOSED SERVICES**  
**IN THE PROPOSED MARKET AREA ARE IN THE PUBLIC INTEREST**

The Applicant's provision of service is targeted to business customers and will provide a competitive alternative to the public. It will promote, through competition, the efficient use of the telecommunications networks. Customers will benefit by having alternatives from which to choose and from general improvements in price, features and options that are generated by competitive pressures.

The Applicant's proposed services will provide multiple public benefits by increasing the efficiency of incumbent carriers by providing users of telecommunications services with greater reliability and by increasing the competitive choices available to users in the State.

Enhanced competition in telecommunications services likely will further stimulate economic development in Ohio. In addition, increased competition will create incentives for lower prices, more innovative services, and more responsive customer service.

Furthermore, the approval of this Application will not adversely affect the incumbent carriers' service.

Competition will also stimulate the demand for the services supplied by all telecommunications carriers, including those of the incumbent carriers. The carriers will have market incentives to improve the efficiency of their operations and will benefit from the increased use of their services, due to the expansion of the total market and by their competitively driven prices.

Further, as demonstrated above, the approval of this Application will provide significant benefits to consumers in the state of Ohio in terms of carrier choice, price, increased reliability, responsiveness, and the introduction of new services. Additionally, as competition has driven telecommunications prices downward, businesses have seen reductions in their operating costs and increases in their sales, which have contributed to the viability of the economy and employment levels.
